## EXPERIENCE

### Web Experts Nepal

*React Developer*

Jan 2024 – Present

- Enhanced an existing job-seeking platform by adding new features and improving existing ones, including profile creation, resume upload, job applications, and search functionality.
- Integrated end-to-end payment and dynamic subscription systems using PayPal and Stripe, leveraging webhooks for automated transaction processing and subscription management across both frontend and backend.
- Designed and developed a user-friendly system for managing consultancy services, blog content, and sales data, featuring role-based access control to streamline and secure administrative operations.
- Designed and implemented a tier-based loyalty program in Strapi, enabling reward accrual and automated tier changes based on user spending behavior.

### Web Experts Nepal

*Associate React Developer*

Jan 2023 – Jan 2024

- Developed an internal management system to monitor employee project logs, leave tracking, and operational workflows.
- Utilized Ant Design for UI development, React Query for state management and data fetching, and Recharts for interactive data visualization.
- Gained hands-on experience with the MERN stack by fixing bugs and building new features to enhance overall application performance.
- Developed a mobile app with React Native and Expo, incorporating fingerprint authentication and push notifications to improve security and user engagement.
- Designed and implemented a responsive, modern user interface for a betting platform using Next.js and Shadcn UI.

### Web Experts Nepal

*React Trainee*

July 2022 – Jan 2023

- Implemented role-based access control (RBAC) to ensure secure and permission-based functionality across the application.
- Created dynamic, interactive data visualizations using Recharts (bar, pie, and line charts) and React Google Charts (Gantt charts).
- Developed a role-aware dynamic navigation system to enhance user experience and streamline access based on user permissions.
- Revamped responsive design for mobile devices, enhancing front-end user experience in mobile devices.

### Web Experts Nepal

*React Intern*

April 2022 – July 2022

- Developed a Shop and Mall Management System, featuring user authentication, search functionality for shops and malls, and full CRUD operations accessible through an admin panel.
- Implemented form validation using React Hook Form and integrated Firebase for image storage and database management.

## TECHNICAL SKILLS

**Languages:** Javascript, Typescript, HTML/CSS

**Frameworks/Libraries:** React, NextJS, Redux, Zustand, ShadcnUI, MaterialUI, TailwindCSS, Node.js, ExpressJS, Strapi

**Developer Tools:** Git, Vercel, Firebase, Postman, VS Code

## EDUCATION

### Nagarjuna College of Information Technology

*Bachelor of Science in Computer Science and Information Technology*

*Lalitpur, Nepal*

### Moonlight Higher Secondary School

*Science Faculty*

*Lalitpur, Nepal*
